CHROMOSOME COMMENTS - Dr. S. C. Harlan (Cont'd)

Skovsted greatly extended his work on chromosomes in Malvaceae in two later papers not cited by White. viz: Comptes Rendus d Lab Carlsberg Ser Physiol Vol 23 :195 and Vol 24 No 1.

(Dr. S. C. Harlan is quite well known for his work as a geneticist with the hibiscus cousin - Cotton. He is living in Peru, South America at present. He has written an article for the Gardeners Chronicle (England) on the possibility of crossing H. Syriacus and H. Rosa-sinsnsis. - Editor)

# AMATEUR vs. COLLECTOR

The line of demarcation for Amateur and Collector exhibitors is still 25. Twenty-five varieties and below being grown qualifies an exhibitor for Amateur, provided he is not Commercial. Non-commercial grower of 26 varieties and up designates a Collector. This is the same as last season.

All chapters should use this figure as the Norman Reasoner trophy is based on the number of Amateur entrants in a show.

This division line is impossible to police. The show chairmen will have to rely on the honesty of our members. Some of the exhibitors were getting pretty close to the line last season. Perhaps they are now going to step up and exhibit in the Collector class where the going is tough.
